- Delphi
- Developer 1C

LANGUAGE

Ukrainian - Native

Russian - Native

English - Intermediate, Studying

Hebrew - א+, Studying

My book "**Oracle 9i Administration**": [book-oracle-9i-admin](#)

EXPERIENCE

Backend/Frontend (2022 - 2024) I have successfully completed a Front-End Development course, gaining expertise in: HTML, CSS, and Bootstrap, JavaScript, jQuery, React, Redux, TypeScript, etc. You can view my recent projects on GitHub.

Currently, I am focused on Java-based client-server application development, utilizing technologies such as Spring, Lombok, and RestTemplate. I also work with Spring Boot, Spring Security and databases like PostgreSQL, MySQL, MongoDB. Additionally, I perform testing using JUnit and Mockito.

Oracle Database Administrator (2001 – 2013) I continued to work as an Oracle database administrator for 13 years (Kharkiv Regional Energy Administration), managing terabyte servers and around 500 users, optimizing queries, and planning daily cold and hot backups of servers. Over the course of 2 years, I automated the credit department and part of the finance department, bringing projects into operation. (Frontend part – Delphi, backend - Oracle)

Developer «1C» (2013 – 2022) At the same time, I worked as a developer for the 1C accounting program and improved the operations of about 15 firms while working in a franchise of 1C, and many clients returned and referred their acquaintances.

Companies: Depstor, Intertool, ASTER-consulting, IT-LANCE, Starlight Media, Ocean Technology..
