Additional: PowerDesigner, Jira, Photoshop, Figma

My book "Oracle 9i Administration": [book-oracle-9i-admin](#)

Professional Experience

○ Full Stack Developer, BigNorth LTD (Belgium, remote) **2022-present time**

A delivery site is in development that provides a database of local Belgian farmers. Designing and developing the web application interface, creating components, galleries (JavaScript, TypeScript, React, Redux), adding a registration and authorization system for potential customers, administrators using Spring Security and JWT. Maintaining and developing for database PostgreSQL. Participating in the development of the protocol API, and API integration. Experience in configuring logging systems, analyzing logs for issue identification and optimization. Participating in debugging and fixing bugs.

Tools: Java, Spring Boot, Spring Security, PostgreSQL, JUnit, Maven, Next.js, React, TypeScript

○ Java Backend Developer, IT-LANCE (Kharkiv, Ukraine) **2020-2022**

Maintaining existing functionality and developing new data exchange services between distributed ERP modules (Java, php). This includes: collecting statistical data from clients, analyzing and storing this information in the DB, transferring analytics to the accounting department, generating summary reports, integration with the external Bitrix system. Built a full-stack feature for processing external parking data: backend services handled data ingestion and analytics, while the frontend displayed insights on the website and triggered automated email summaries for managers. Actively communicating with clients to clarify requirements, and preparing technical specifications and work plans.

Tools: Java, Spring, JavaScript, TS, Redux, GitHub, MySQL, Mongo

○ Software Developer 1C, (Kharkiv, Ukraine) **2016-2021**

Companies: Depstor, Intertool, ASTER-consulting, IT-LANCE, Starlight Media, Ocean Technology (Kyiv)

Developer for the 1C accounting program and improved the operations of about 15 companies while working in a franchise of 1C. Optimization of requests, preparation of technical tasks, creation of accounting and logistics reports and convenient data processing. Connection and configuration of peripheral equipment. Experience in preparing detailed technical specifications and work plans, communication skills with clients, including gathering and analyzing requirements.

Tools: 1C, MySQL, PowerDesigner, VS Code, GitHub, Bitrix24, Postman, HTTP Services, FTP, JSON

○ ORACLE DBA, Kharkiv Regional Energy Administration (Ukraine) **2006-2016**

Managed terabyte servers and around 500 users, optimizing queries, and planning daily cold and hot backups of servers. Over the course of 2 years, I automated the credit department and part of the finance department, bringing projects into operation. (Frontend – Delphi, backend - Oracle)

Tools: Delphi, Oracle, PowerDesigner

Education

MSc in Computerized aircraft systems

2000-2006

National Aerospace University, Ukraine
