- Developer 1C

LANGUAGE

Ukrainian	Native
Russian	Native
English	Intermediate, Studying
Hebrew	א+, Studying

My book "Oracle 9i Administration":
http://deepedit.ru/book-oracle-9i-admin.html

About me

I like understanding both the basics of programming, such as data structures and algorithms, as well as new technologies, libraries, and frameworks. Currently, I am studying Java technologies and TypeScript to write safer and more error-resistant code. In the future, I plan to master Next.js to deepen my understanding of React. My favorite Front-end projects invite to recognize on my profile

I started my career from scratch and immediately became involved in the development of several projects, including both server-side and interface parts, as well as client communication and drafting specifications. Over the course of 2 years, I automated the credit department and part of the finance department, bringing projects into operation. (Frontend part – **Delphi**, backend - **Oracle**)

Oracle Database Administrator (2001 – 2013) I continued to work as an Oracle database administrator for 13 years (Kharkiv Regional Energy Administration), managing terabyte servers and around 500 users, optimizing queries, and planning daily cold and hot backups of servers.

Developer «1C» (2013 – 2022) At the same time, I worked as a developer for the 1C accounting program. I improved the operations of about 15 firms while working in a franchise of 1C, and many clients returned and referred their acquaintances.

My internal motto is: *"There are no unsolvable problems."* The key is proper analysis of the issue, prioritization, and a well-drafted specification.

Companies: Depstor, Intertool, ASTER-consulting, IT-LANCE, Starlight Media, Ocean Technology

I have been in Israel since 2022. I completed the Alef Hebrew school and improved my English from a beginner to an intermediate level. Currently, I am advancing my programming skills at Tel-Ran. My goal is to contribute to impactful projects and bring tangible benefits and success to the company that chooses me.
