Professional Experience

■ Full Stack Developer   2022-present time

Corporate web application. Designing and developing the web application interface, creating and filling the site pages, creating components, galleries (HTML/CSS, JavaScript, TypeScript, React, Redux), adding a registration and authorization system for potential customers, administrators, setting up a content management system, creating and optimizing the database MySQL. Collaborating with the backend team to integrate APIs and ensure reliable functionality.

■ Backend Java, Spring, *IT-LANCE*   2020-2022

Maintaining existing functionality and developing new data exchange services between distributed ERP modules (Java, php). This includes: collecting statistical data from clients, analyzing and storing this information in the DB, transferring analytics to the accounting department, generating summary reports, integration with the external Bitrix system.

■ Software Developer 1C   2016-2022

Companies: *Depstor, Intertool, ASTER-consulting, IT-LANCE, Starlight Media, Ocean Technology*
Developer for the 1C accounting program and improved the operations of about 15 companies while working in a franchise of 1C. Optimization of requests, preparation of technical tasks, creation of accounting and logistics reports and convenient data processing. Connection and configuration of peripheral equipment.

■ ORACLE DBA, *Kharkiv Regional Energy Administration*   2006-2016

Managed terabyte servers and around 500 users, optimizing queries, and planning daily cold and hot backups of servers. Over the course of 2 years, I automated the credit department and part of the finance department, bringing projects into operation. (Frontend – Delphi, backend - Oracle)

Education

Tel – Ran, Israel (2023 – 2025) - Full Stack Java Development

National Aerospace University, Ukraine (2000 – 2006) - Engineer - Construction and design of aircraft.
